## CRANE & HOIST SERVICES

**Tested and Proven Overhead Equipment Operations Provide for a Safe and Functional Working Environment**

H&N Electric offers a unique capacity in the Preventive Maintenance services arena designed to help our customers provide a safety and operational check-up for early detection of electrical and/or mechanical problems on hoists, cranes, chains and cables. Any form of weakness or lack of functionality can impact people, equipment and losses in the manufacturing process. These are inspections mandated and required by law by OSHA and ANSI and other legal and insurance organizations to be performed at least once annually.

Our certified and highly trained Services technicians, can affect repairs to problems both in the electrical systems and mechanical apparatus.

### Benefits

- Reduction of production losses due to unplanned downtime.
- Reduced maintenance and repair costs.
- Decreased Insurance Rates
- Saved Lives and Product
- Adherence to Laws & Regulations.

### Features

*Our technicians can assist with:*  
Service of Multiple Manufacturers  
Single source for inspection, repair, upgrades, replacement parts, modernization and installation.  
Cranes including Jib, Gantry and Bridge  
Hoists including Wire, Chain & Lever  
Air Hoists (In shop only)  
Manual, Electric or Radio Controlled

Advance notice of developing problems enables you to conduct the necessary adjustments or repairs before costly, catastrophic failures occur.
